NICOLS C-506

Nicols C-506 är ett 6-kretsars ljusbord med reglar samt master.

Ett perfekt ljusbord när ingen programmering krävs, bara manuell användning. C-506 passar också bra i enklare infärgning tillsammans med RGB LED-armaturert.ex. Chauvet Colordash Batten, Colorado-serien. m.fl.
Ett annat användningsområde är att styra dimmers eller för att styra interna program/macron via DMX (Colorstrip m.fl.) där man vill kombinera manuell kontroll men ändå kunna använda armaturernas interna och ljudstyrda program/macron.

Levereras med 230V trafo.
Spänning: DC 9V, 100mA (min)
Vikt: 0,8 kg
Dimension: 173x153x55 mm
Protokoll: DMX-512
Utgångskontakt: 3-polig XLR ho
. Antal kanaler: 6
Batteridrift möjlig
Polaritetswitch / DMX

SoundSwitch Micro-DMX Interface

SoundSwitch Micro-DMX Interface DMX lighting control for DJs
Software & Hardware for DMX Lighting Control Simplified!SoundSwitch is the worldâ€™s leading lighting control solution. It lets users create custom lighting shows and scenes that are automaticallysynced with audio files when played back live in DJ software. Users can be as creative as they like in the Digital Lighting Workstation(DLW) or let the software do the work via the automation features or pre-built lighting scenes. SoundSwitch allows DJs and lightingdesigners to sync lighting visuals with live audio seamlessly which are outputted to the lighting array via SoundSwitch hardware orthird-party supported interfaces. More creative possibilities and an elevated performance are all possible for DJs and lighting techsalike with SoundSwitch. With the SoundSwitch Micro DMX Interface, simplify your lighting setup with a single USB to DMX connectorfor support of one DMX universe. From the get-go, the SoundSwitch Micro DMX Interface doesnâ€™t disappoint with 3 months freeSoundSwitch software access so you can jump right in and create automatic light show with beatgrids, compatible with Serato DJ,Virtual DJ and Engine Prime.About SoundSwitch **Edit Mode - Digital Lighting Workstation Specifically Designed for DJs** SoundSwitchâ€™s Edit Mode is where users can be as custom or automated as they like. Users can work in the Digital Lighting Workstation(DLW) to edit their preset light scenes or build and customise their own lighting displays. The workflow and user interface has beendesigned to be similar to audio editing and music production software providing a familiar look and feel for DJs. **Create Custom Lighting Displays** SoundSwitch allows for full customisation and lighting control. Users can control every feature

of their lighting hardware includingcolour, brightness, strobe, movement, gobos, prism and more. **Autoloops - Automatic Light Shows Synced with DJ Software** The Autoloops feature automatically syncs lighting scenes with audio files that donâ€™t have scripted light shows as the DJ performs.The software ships with 32 prebuilt Autoloops which are all customisable and will always cue perfectly on the beat when needed. **AutoScripting - Automatic Light Show Creation** Batch analyse audio files, playlists, collections and crates for Automated lightshow creation. **Static Looks - Lighting Scenes** Static Looks provide users with an easy way to create lighting scenes; a common tool in the mobile DJ field. These static scenescan be created to light speeches, the dinner service or provide ambient lighting at any event. Static Looks can also be MIDI mappedallowing for complete touch control. **Supports Leading DJ Software and Hardware** SoundSwitch connects with the following DJ software and hardware providing precision timing and synchronisation while the DJperforms. Engine Prime StagelinQ (Prime 4, SC5000/M, X1800) Serato DJ Pro <li> Virtual DJ <li> Ableton LINK **Standalone Mode** In Standalone Mode, SoundSwitch users can control lighting effects for other DJs and performers such as bands and live acts. **Editable Presets and Effects** SoundSwitch includes a number of Presets and Effects which users can edit to their liking, saving time and effort. **MIDI Map Lighting Effects** The software includes MIDI mapping functionality to allow users to map and control lighting effects with any standard controller, Mixeror MIDI device. **Multiple Universe Support** SoundSwitch supports two DMX Universes with 1024 DMX channels, allowing for control over both small and professional sizedlighting rigs.SoundSwitch â€“ Key Product Features <ul> Automatic Light shows Synced with beatgrids <li> Compatible with Serato DJ, Virtual DJ and Engine Prime <li> Ableton LINK <li> AutoScripting Light Show Generation <li> MIDI Mapping and Control of Lighting Effects SoundSwitch MICRO-DMX Interface <ul> Interface for SoundSwitch Lighting Software <li> Connect lighting hardware directly to computer via USB <li> USB to DMX XLR Connector <li> Blue LED Connection Status Indicator <li> Compact Portable Design <li> 3 Months Free Software Access
