SKB 1SKB-62 Fender® Jaguar®/Jazzmaster® Type
Hardshell Case

The 1SKB-62 case is molded with proprietary rubber-modified styrene that provides maximum protection and durability. The EPS (Expanded polystyrene) plush-lined interior is designed to securely hold either a Fender® Jaguar® or Fender® Jazzmaster® guitar. The 1SKB-62 is the first ever molded case designed specifically for these models and features SKB's patented fiberglass reinforced nylon trigger release latching system with the inclusion of a TSA recognized and accepted locking latch. The TSA lock enables you to lock your case yet still be inspected for airline security. The TSA logo notifies TSA screeners that the latches do not need to be broken for a security check. A cushioned rubber over-molded handle for a comfortable carry with molded-in feet and convenient stacking wells are part of the exterior contours providing added convenience when transports multiple cases. The case features an accessories compartment and is covered by SKB's unsurpassed no-fault Million Mile Warranty (Lifetime Warranty).
