sE Electronics RF-Pro Mounting Kit RF Pro Mounting
Bracket Upgrade Kit

For any Reflexion FilterÂ® PRO from 2006 to

2016 Inspired by professional drum hardware - and the stand mount from our flagship RF SPACE - this hardware upgrade kit for the RF Pro helps to increase stability, simplify ease of use, and provide an updated level of performance, durability, and aesthetics. It allows panning and tilting for maximum flexibility, and all moving parts are chromated to ensure low wear. The extra stability means that your RF Pro can be positioned solidly at any angle to help provide a "dry" sound when recording any source - vocals, acoustic and electric guitars, amplifiers, drums, room mics, strings, and countless other instruments. The RF Pro Hardware Upgrade kit comes complete with the updated hardware, a mic thread adapter, and a screw wrench for assembly.
