ROLLS PM60 Personal Monitor Mic Preamp with phantom power

The Rolls PM60 is an all in one Personal Monitor headphone amp with a fully functional Microphone Preamp built in. Now there is a way to have a personal monitor without the need for a dedicated mixer board with a mic preamp and microphone phantom power. The PM60 has all those features built in. The PM60 has many uses other than personal monitoring, it can be used as a stand-alone mic preamp with headphone monitoring, it can be used as a mic monitoring headphone amp for direct recording, and it can also be used as a two channel mixer with stereo line 1/4" or 1/8" out. It is perfect for podcasting, home recording, mixing, boom mic monitoring for camera recording and mixing, or as a stand-alone personal monitor. The PM60 is an all in one unit that has many capabilities. Made in the USA, with an all steel chassis, the PM60 is built to last.
