

### ► Features

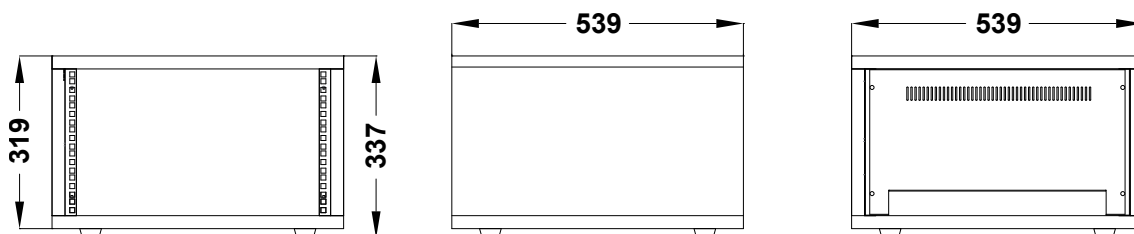

- Stores up to 6 units of 19" equipment
- Cable entry on bottom
- Punched square holes for use with snap-in cage nuts

### ► Description

The PR206 is a professional 19" metal rack compliant to ANSI/EIA RS-310D, DIN41491, IEC 60297 standards. The rack comes in a flat pack as DIY kit. It is a solid construction with a cold rolled steel 1,5 mm thick frame and plates. The rack is provided with punched rack profiles for use with snap-in cage nuts on the front side and stores up to 6 units. The rear panel can be screwed off for easy installation and has a cable entrance on the bottom. Optional available rack doors with plexi or grilled front finishing prevent the equipment from being accessible by unauthorized people while optional available wheels provide mobility to the equipment.
